

Open Main.js File

Create an array
called "Names"

Create a For Loop
called people; add
each name from
you array

Using the
Math.random()
method) allow the
For loop to
randomly chose a
name and a row

Create a function
called
"populateHTML"
(output persons
name & job)

Set up an
interval that
calls the
runUp
function 3
sec

Do you
have your
5 names
chosen?

Yes

Insert
them into
the array

No

Figure
out your
5 names

Do you
have
duplicate
names?

No

Yes

Make sure there are
no duplicates!
Review your
function.
